

Mayar Akok

Software Engineer

✉ akokmayar607@gmail.com ☎ 0798734353

Aspiring open-minded software engineer with a strong foundation in coding and problem-solving.

Eager to contribute technical skills and learn from diverse experiences while supporting impactful projects that address real-world challenges

Experience

● Front-end Developer/Graphic Designer

Kenya Red Cross Society/Moringa School

- Created Figma designs and later implemented it on the frontend using React JS.
- Designed and implemented advertisement and office posters using Canva.
- Utilized JEST for automated testing and deployment.
- Configured and created responsive websites using Tailwind ,Bootstrap and CSS .
- Honed my problem solving skills through creating problem-solving centred websites and debugging.
- Used Git version control system on individual and collaborations in group projects.

● Back-end Developer/Database Manager

Moringa School

- Structured relational databases with well-defined table relationships to ensure data accuracy and scalability.
- Designed and implemented RESTFUL APIs to handle client-server interactions.
- Utilize continuous integration (CI) and continuous deployment (CD) pipelines for automated testing and deployment.
- Used Postgresql or MongoDB on database deployment.
- Implement GIT Collaboration on teamwork projects.
- Created a Postgresql instance on Render and deployed a Python Flask integrated backend.

● Cloud Practitioner

AWS Re/start Program

- Gained a solid understanding of core concepts of cloud computing and AWS services like EC2 ,S3,IAM and VPC
- Navigated the Linux command line,manage files,users and systems.
- Learned the basics of IP addressing,routing,firewalls and applied cloud security best practices
- Deployed and managed AWS resources using both the CLI and AWS Management Console

● Scrum Master

- Lead a software developers team in the development and implementation of software solutions.
- Facilitated occasional meetings to check if everyone had met their daily goal in terms of software development
- Acted as the central point on git collaboration.
- Planned activities using Trello Board or Jira

Education

● Modcom Institute

Software Development

- Got a strong foundation in web development with HTML, CSS, and Python Flask

● Moringa School

Software Engineering

Database Management

- Designed and implemented relational databases for various systems
- Integrated databases with restful APIs.

User Interface Development

- Created Figma Designs on start of web development
- Collaboratively, developed a fully responsive e-commerce website using React JS and CSS.

● eMobilis Technology Training Institute

Cloud Computing

- Gained a strong foundation in cloud fundamentals with AWS(EC2,S3,IAM,VPC), Linux system administration,networking and security,python scripting and databases

Skills

- Software Development
- Project coordination
- SQL database management
- Integrity
- Time Management
- Cloud computing

Projects

Bonmaj

- An e-commerce website that caters for both the client and the seller.
- The client has a wide access to products on ordering.

Cloudstore

- It is a website designed for file management purposes in the most user-centric way.
- A user can organize, share, and upload files using cloud services(Cloudinary)

Technologies

- Python Flask
- Figma /Canva
- CI/CD pipelines
- Tailwind CSS
- AWS Cloud
- SQLAlchemy
- Render
- Bootstrap(React)
- React JS
- Cloudinary
- Vercel
- JWT
- Postman
- OAuth
- CSS
- SQL (PostgreSQL,MySQL)
